Why the West Rules - for Now: The Patterns of History and What They Reveal About

Why does the West rule? Eminent Stanford polymath Ian Morris answers this provocative question, drawing on 15,000 years of history to show how the West has come to dominate the world.

In the middle of the eighteenth century, British entrepreneurs unleashed the astounding energies of steam power, and the West began to dominate the world. By the late nineteenth century, the West had become the dominant force in the world.

Today, however, many worry that the emergence of China and India spell the end of the West as a superpower. But Ian Morris argues that the West's dominance is not a fluke, but the result of deep historical forces.

With flair and authority, historian and archaeologist Ian Morris draws uniquely on 15,000 years of history to show how the West has come to dominate the world.
