If not, that's verjetno because it's bil lurking in the Labs section skupaj z drugimi ideas , ki sodelujejo live experimentation. As of now , čeprav, prevod should be tam in front of you as a reden pojav, and pošteno, it brings povsem new life to tuje spam. Meanwhile, other Lab features so sacked, such as the Old Snakey time-frittering igre and also Mail Goggles, which testira your sobriety with matematičnih puzzles , preden letting you kliknite 'Pošlji' in the majceno hours of the morning. Ah no, the best laboratoriji are often the least crowded.
