Language Immersion a la Google

Google je izdelal enostavno orodje za samostojno učenje tujih jezikov. Če se želite naučiti hrvaško, lahko uporabite avtomatski prevajalnik, ki vam prevede samo del vsebine, odvisno od tega, kakšno je vaše predznanje. Seveda so prevodi včasih smešni, vseeno pa z branjem avtomatsko aktivirate oba "jezikovna korteksa". Učenje je zato lahko in celo zabavno, takole na primer:

ki lets you prejemate in polije
contact? If not, that's verjetno beca
delujejo live experimentation. As of
nd politeno, it brings povsem new li
(the Old Stakay time-frittering igne
puzzles , preden letting you kliknite
rij are often the [least crowded](#).

Ali pa takole:

Ever used [Gmail](#)'s avtomatsko message prevod feature, ki lets you prejemate in polije emails na da
ki iploh lothering to obvestilo native language vasega contact? If not, that's verjetno because it's kil
lurking in the Labs section skupaj z drugimi ideas , ki sodelujejo live experimentation. As of now , čeprav,
prevod should be tam in front of you as a reden pojav, and politeno, it brings povsem new life to tuje
[sites](#). Meanwhile, other Labs features so sacked, such as the Old Stakay time-frittering igne and also Mail
Goggles, which testira your sobriety with matematičnih puzzles , preden letting you kliknite 'Polji' in the
majeno hours of the morning. Ah no, the best laboratoriji are often the [least crowded](#).
